EDUCATION

National University of Singapore | Singapore, SG

- **Bachelor of Computing in Computer Science (Honours) with NUS College (USP)** Aug 2023 - Jul 2027
- **Relevant Courses:** Programming Methodology (JS), Data Structures & Algorithms, Software Engineering (Java)

Ngee Ann Polytechnic | Singapore, SG

- **Diploma with Merit in Aerospace Electronics with Business Management | GPA: 3.99/4.0** Apr 2018 - May 2021
- **Relevant Courses:** Computer Programming (C), Applications Programming (C#)
- **Awards:** Rotary Switchgear Silver Medal & Prize (Salutatorian), Lien Ying Chow Scholarship, Director's List

PROFESSIONAL EXPERIENCE

AI Software Engineer | CME-Pro | Singapore, SG

Mar 2026 - Present

- Automated internal customer support workflows by designing and developing a Retrieval-Augmented Generation Agent Model using **n8n**, **Docker**, **AWS**, and **Gemini**.

Junior Full Stack Developer | Monark Inc. | Toronto, Ontario, CA

Aug 2025 - Feb 2026

- Led the complete mobile rebuild of Monark's application using **React Native** and **Expo**, supporting 1,500+ users across 30+ SMB and enterprise customers
- Replaced a legacy production mobile system with a modernised architecture, significantly reducing technical debt and improving long-term maintainability
- Designed and implemented 80+ production-grade screens including navigation stacks, tab systems, drawers, and modal flows

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, C, C#, Python, Bash Scripting, HTML/CSS
- **Others:** React, React Native, Next.js, TailwindCSS, JavaFX, JUnit, Expo, Bootstrap, Vim, Git/GitHub, Adobe XD, Linux, Docker, n8n, AWS

PROJECTS

Ultimate Tic-Tac-Toe Agent Model | AI & ML Project

Mar 2025 - Apr 2025

- Engineered a competitive AI agent using alpha-beta pruned Minimax with caching optimisations, achieving a 100% win rate against 12 benchmark agents
- Implemented various **AI & ML** techniques in determining heuristic functions to estimate utility for best moves

Benchmarking Platform for SQLancer | Software Developer

Jan 2025 - Apr 2025

- Headed a team of 6 in building a benchmarking platform for **SQLancer**, a database management system bug tracker
- Built a web frontend dashboard visualising benchmarking metrics using **Next.js**, **React**, **TypeScript** and **Vercel**
- Worked on sprint planning, sprint introspection and product design with product owner fortnightly using **ScrumBan**

InternBuddy | Team Lead | Software Engineering Team Project

Aug 2024 - Nov 2024

- Led a team of 5 to propose and develop an internship application management system using **Java** and **JavaFX**
- Directed effective communication within the team through weekly developmental sprints and milestones
- Managed product integration, testing, and code quality while evolving AddressBook Level 3 in a brownfield manner

FinTrack by Finnovations | Software Engineer | Independent Software Development Project

May 2024 - Aug 2024

- Co-developed a finance tracking mobile app using **React Native** and **Firebase**, implementing authentication, analytics dashboards, transaction CRUD, chat, and social features
- Designed user interface (**UI**) for optimum user experience (**UX**), structuring information architecture for intuitive navigation aligning with modern designs and best practices, real-time synchronisation with **Firebase** and **Firestore**

LEADERSHIP EXPERIENCE

Deputy Director | Technologies Directorate | NUS Students' NUS College Club, Singapore

Sep 2024 - Sep 2025

- Spearheaded refresh of the club's website and building community products for our community (e.g. LaundroBot, QueueBot, Logistics Database)
- Planned system architecture designs for individual community products with various stakeholders
